

UKMap Training

Successful Training from the Experts in Geographical Information

Getting to Grips with UKMap

Training4GIS understands that education and training are critical to getting the most from UKMap.

The UKMap data structure is significantly different from other large scale mapping products. It contains feature type codes and land use codes that are key to the display and querying of the map. It also includes a wealth of point and feature information, height data, addresses, and points of interest.

Understanding these differences and the wealth of features is essential for anyone wishing to effectively use, demonstrate or show knowledge of UKMap.

Our UKMap training course has been designed to give you the full range of skills you need to confidently work with UKMap and provide you with techniques that transfer directly to your work environment.

Ensuring the Best Training

Training4GIS, the training and consultancy division of The GeoInformation Group, has over 25 years of training expertise within the field of geographical information. All our courses carry AGI CPD accreditation, ensuring you of the very best training.

The UKMap Training

The UKMap training programme can be taken as a one or two day course depending on the individual requirements of the attendee. It provides a comprehensive learning path that takes full advantage of the information that UKMap offers.

The first day of the programme is designed to give UKMap users, demonstrators and consultants the underpinning knowledge of UKMap. The follow up day is aimed at UKMap users and consultants who wish to receive hands-on experience in the application of the data.

Day 1: Introduction

This foundation course is designed to give an immediate overview and understanding of the basic relationship of features and attributes in UKMap and who wish to query and display UKMap data efficiently. This will be provided through a series of lectures, demonstrations and group discussion.

Topics covered include:

- UKMap product layers
- UKMap layer attribution UKMap collection
- Accuracy and maintenance
- UKMap display and applications
- UKMap licensing and pricing

Day 2: Advanced

Students will apply their knowledge gained from the previous course through practical sessions using real case studies. This will accelerate the attendees' ability to fully exploit the UKMap tools and create, present and analyse the data in an effective manner.

Topics covered include:

- Querying data
- Relating information to applications
- Presenting mapping data
- Deriving new data

Why Attend?

- Become UKMap accredited
- Gain a thorough understanding of UKMap's feature rich datasets
- Learn how to link these data to your project
- Find out how to interrogate and display the data
- Appreciate the copyright, usage and licensing regulations
- Realise the current and potential UKMap applications
- Receive CPD points towards achieving and maintaining Chartered Geographer (GIS) status

Course Venue

Food and refreshments are included in the price of all UKMap courses.

Courses are run at The GeoInformation Group's head office in Cambridge as well as venues throughout the UK. Courses can be delivered off-site if there are sufficient numbers.
